

Green Schools Brighten Up!

Schools continue to request installation of see-through SerraGlaze Daylight Redirecting Film to naturally brighten the classroom while cutting glare. Studies show properly day-lit schools reap marked benefits for students:

- Reduces absenteeism
- More attentive and alert students
- Improves test scores
- Increases vitamin D fostering student growth and health
- Positive mood in students and lower noise levels

SerraGlaze Daylight Redirecting Films harvest daylight by redirecting sunlight towards the ceiling and deeper into the room. The ceiling becomes a natural light fixture; illuminating classrooms with more desirable and beneficial daylight.
